Multi-page UI, Custom CSS, Render Deployment, DevContainer, Modular Architecture

BloodBank Pro

Mentor: Anshul Sarawagi | Team Size: 4

Key Skills: Flask SQLAlchemy Authentication AIML Python Pandas REST Bootstrap

Project Link: <https://github.com/theinnocentboy/BloodBank-Pro>

BloodBank Pro – AI-Powered Blood Donation Platform | Flask, SQLAlchemy, Scikit-learn, Auth0

- Developed a comprehensive health-tech platform to streamline emergency blood donations and hospital inventory management.
- Engineered an AI-driven donor recommendation engine utilizing geolocation mapping and compatibility scoring.
- Integrated Scikit-learn and Pandas for predictive machine learning models to forecast daily blood demand.
- Built an automated priority system using NLP to extract emergency keywords and route critical medical requests.
- Implemented a strict medical document verification pipeline for hospital prescriptions to ensure operational trust and compliance.
- Added a secure admin command center featuring real-time Chart.js analytics and Auth0 multi-factor authentication.

AI Resume Analyzer

Mentor: Prof. Abizer Hakimuddin | Team Size: 1

Key Skills: Python Flask SQLAlchemy REST Bootstrap Groq API

Project Link: <https://github.com/theinnocentboy/AI-Resume-Analyzer>

AI Resume Analyzer – AI-Powered ATS Evaluation System | Flask, SQLite, Groq API

- Developed an AI-based web application to analyze resumes, calculate ATS scores, and provide improvement suggestions.
- Integrated Llama AI through Groq API for skill extraction, resume feedback, and job-description matching.
- Implemented PDF processing, secure user authentication, and personalized analysis history using Flask and SQLite.
- Built a responsive dashboard displaying resume insights, compatibility scores, and AI-generated recommendations.

ACHIEVEMENTS

- Secured 12 rank in the National Level AI Hackathon – Samadhan 1.0.
- Earned a Elite Certificate - Python for Data Science(NPTEL)
